DETAILED ACTION

If the Applicant continues to prosecute the application, revision of the claim to present the application in proper form is required. While an application can be amended to make it clearly understandable, no subject matter can be added that was not disclosed in the application as originally filed.

Claim 9 has been elected, while claims 1-8 and 10-39 are claims drawn to anon-elected invention.

Claim Rejections - 35 USC § 112

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 9 is multiple sentences in length. The Applicant needs to rewrite the claim to be only one sentence in length. Further, the claim is narrative in form and replete with functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim must be in one sentence form only. Note the format of the claims in the patent cited.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 9 is rejected under 35 U.S.C. 102(b) as being anticipated by Garlick, III.

Garlick teaches a capturing device that is able to clear itself of incoming sediment. The device is a scoop of flexible fabric which is sometime open at its small end. The device of Garlick is able to be pulled through the water. The flexible scoop will expand or contract depending on the direction and speed in which it is moving through the water.

Conclusion

Summary: Claim 9 is rejected.
